Mini Halloween Lampshade

I love to decorate with candles, tea lights, votive candles, and more, especially around the holidays. With so many types of battery-operated LED lights available, it's really easy to make decorative lighting accents yourself with simple items you probably have around the house. This wine glass tea light is perfect for Halloween. The laminated shade is made with napkins, so you can use this idea to make decorative shades for any occasion!

Materials:

- ◆ LED Tea Light
- ◆ Plastic Stemware
- ◆ One Portion Plastic Cup
- ◆ Glue Dots
- ◆ Napkins
- ◆ Paper, for pattern
- ◆ Pencil

Tools:

- ◆ [Xyron Creative Station](#)
- ◆ [Xyron Laminate Cartridge](#)
- ◆ Scissors

Designer Notes:

- ➔ Plastic stemware and one portion cups can be found at your local grocery or party store, together with a wide range of fun napkins!
- ➔ Use decorative edge scissors along the lower edge in step 4 for another look.
- ➔ The second layer of napkin can also be used for another shade.

Instructions:

1. To make a pattern for the shade, cut an 8" circle with a 4" diameter hole cut from the center, and then cut it in half. You can use a circle cutter to make the pattern, or draw around plates, jar lids, etc.
2. Open up the napkin and lay the pattern on top. Cut the napkin in half and trim it at each end so it's a little longer than the pattern. Make sure the pattern covers the elements of the design you want on the shade.
3. Laminate the cut piece of napkin. Do not separate the napkin layers. You can also use the larger laminate cartridge and place the napkin piece horizontally across the width of the cartridge.
4. Place the pattern on the laminated napkin then cut out.
5. The napkin layers will separate after cutting. Use the top layer for the shade. Pull the ends together, overlapping about 1/2" and then secure with glue dots.
6. Assemble the plastic wine glass and then place the one portion cup inside. This will elevate the LED tea light above the bottom so the light will shine through the shade. Place the shade on top of the rim.

Glass Etched Halloween Jug

Halloween is the perfect time for special tricks and treats - so how about etching a unique glass jug for your favorite spooky libations.

Materials:

- ◆ etchall® Re-Usable Etching Crème
- ◆ etchmask
- ◆ etchmask Transfer Paper
- ◆ Jug, Clear
- ◆ [Pattern](#)

Tools:

- ◆ Pik Tool
- ◆ Squeegee
- ◆ Cricut Design Space
- ◆ Cricut Maker
- ◆ Cutting Mat
- ◆ Scissors
- ◆ Towel

Instructions:

1. Download the pattern, put it into Cricut Design Space and cut the stencil with etchmask.
2. Cut a piece of transfer paper large enough to cover the design, remove the backing paper then cover the stencil with transfer paper. Lift the stencil and transfer paper from the cutting mat.
3. Cut the words "Witches Brew" off, as you will place those on the jug separately.
4. Remove the backing sheet from the stencil then transfer onto the side of the jug.
5. Smooth the stencil securely with the squeegee then remove the transfer sheet.
6. Use the pik tool to remove the areas from the stencil that you want to etch.
7. Place the jug on a towel, bunching it up on each side under the jug to prevent rolling.
8. Attach pieces of leftover backing paper around the edges of the stencil folding them upward to create a barrier. Cover the open areas to be etched with a liberal amount of etching crème and spread gently with the squeegee.
9. Wait 15 minutes then scrape the crème back into the container. Rinse away any residue then remove the stencil.
10. Use the pik tool to remove the letters from "Witches Brew" being careful not to lose the tiny pieces. Then, cover with transfer paper,

remove the backing paper and position on the jug. Carefully remove the transfer paper, making sure that the tiny pieces for your stencil are still in place.

11. Smooth away any wrinkles away from around the openings for the letters.
12. Repeat steps 8-9.

Designer Note:

- PLEASE remember that this is etching crème - do NOT rinse in a porcelain sink!! It will etch the glaze.

Upcycled Studio Wraps

To keep organized in my studio, I use lots of small containers: jars, cans, boxes, drawers, etc. So being crafty, I feel those items should be pretty as well as functional. That is where this project comes in: "Upcycled Studio Wraps". I wanted to be able to clean the jars without ruining them, so I created wraps using Velcro Sticky Back for Fabrics so that I could take the wraps off of the jars when needed...how cool is that?

Materials:

- ◆ Burlap, ¼ yard
- ◆ Velcro Sticky Back for Fabrics
- ◆ Scraps: Paper, Fabric, assorted
- ◆ Embellishments: Beads, Flowers, Charms, Lace, Die Cuts, Ribbon, etc.
- ◆ Jars, assorted

Tools:

- ◆ Glue Gun
- ◆ Scissors
- ◆ Ruler

Designer Tips:

- ➔ You can use any type of fabric or decorative cardstock in place of the burlap.
- ➔ If you do not want to make the wrap removable simply glue the burlap onto the jar where it overlaps, then glue the embellishments on top of the overlap to hide it.
- ➔ This is a great project to use up all of those small left over items you have been saving
- ➔ Add a small amount of Fray Check to the corners of the fringe to help keep them from fraying, let dry.

Instructions:

1. Measure around each jar to determine the width and height you need for each wrap, adding one inch to the width for overlap.
2. Cut the burlap to the sizes needed and fringe the top and bottom edges about ¼".
3. Cut the Velcro to the height of the burlap.
4. Attach the hook side onto one end of the burlap and the loop side to the other end. Place the wrap onto the jar and adjust if needed then remove the wrap.
5. Glue the embellishments onto the wrap as desired.
6. Place the wrap onto the jar after the glue has dried.
7. Attach trim to the top of the jar as show in the photo to give the jar a finished look.
